**Report Overview:** This publication on the Status of Women in Claiborne County is part of a statewide publication of the Tennessee Economic Council on Women, *The Status of Women in Tennessee Counties, 2004*. The Economic Council on Women is a State agency created under TCA § 4-50-100, et seq. by the One Hundredth General Assembly in 1998 to address the economic needs of Tennessee women.

## The Status of Women in Tennessee Counties

### CLAIBORNE

Women have taken remarkable strides towards economic equality, from education to earnings to political participation. Women are now pursuing goals such as business ownership, leadership roles in their careers, and election to state and federal political office. However, obstacles still exist in the climb toward equality. Nationwide, equal numbers of men and women are obtaining four-year college degrees; however, these gains have not translated into pay equity. The average college-educated woman working full time earns \$44,200 a year compared to \$61,800 for men in the same category. Women are still under-represented in many of the highest paying, fastest growing sectors of the economy. Helping women break into these traditionally male-dominated areas like computer science, engineering, mathematics and technology, as well as all skilled-labor positions, gives women tools for self-sufficiency and understanding of their personal capabilities, and these advances are good for the economy of our counties and of our state.

#### Employment and Earnings

The employment and earnings index includes data on women's annual earnings, the earnings gender gap, female labor force participation, female unemployment, and percentages of women in professional or managerial occupations.

- ◇ The median annual earnings for a women in Claiborne County is \$6,329 less than the median annual earnings of a man in the county.
- ◇ Women make up 45.4% of the labor force in Claiborne County.
- ◇ The female unemployment rate of 8.2% is slightly higher than the overall county unemployment rate of 7.3%. Both rates are higher than that for Tennessee which is 5.5%.
- ◇ Among all working individuals in Claiborne County, 22.1% work in managerial or professional occupations, but when only female workers are considered, that number increases to 27.1%.

#### Economic Autonomy

The economic autonomy index includes information on educational attainment, business ownership and general quality of life issues.

- ◇ Claiborne County ranks in the top 15 in three economic autonomy indicators: women-owned businesses (30.3%), female high school dropout rate (3%), and adolescent pregnancy rate (26.1 per 1,000 girls, aged 10-19).
- ◇ Though there is one private four-year college in the county, another in Greene County, and the University of Tennessee in nearby Knoxville, only 9.2% of women in the county have a four-year college degree or better.
- ◇ Despite making up over 30 percent of the privately-owned businesses in Claiborne County, women-owned businesses only account for 4.1% of the total sales and receipts of private firms in the county.
- ◇ In Claiborne County 37.4% of women do not have a high school diploma or equivalency and 23.7% of women earn below poverty level incomes.
- ◇ Of all families in the county, 18.4% are in poverty, but 44.2% of female-householder families with no husband present are in poverty (564 such families).
- ◇ Though women account for 51.7% of the county population, only 7 out of the 30 elected county officials are women.

# ABOUT THE COUNCIL AND THIS REPORT

Claiborne County

*The Status of Women in Tennessee Counties* report offers an economic profile of women in each county of Tennessee and examines how women's rights and equality vary among the counties. The report presents data and overall rankings in two categories of women's economic status: employment and earnings and economic autonomy. Indicators of women's status in each category make up the composite rankings of the counties.

The employment and earnings section presents data on women's annual earnings, the earnings gender gap, female labor force participation rate, the female unemployment rate, and the percentage of women in managerial occupations.

The economic autonomy section includes information on the percentage of businesses owned by women, educational attainment levels, percentage of households headed by a single female, single female headed households living in poverty, percentage of women with health insurance, the high school dropout rate and the teen pregnancy rate.

The **Tennessee Economic Council on Women** was created in 1998 by the Tennessee General Assembly to assess Tennessee women's economic status. The Council develops and advocates solutions to address women's needs in order to help women achieve economic autonomy. In setting its priorities, the Council selects issues that are timely and likely to result in positive changes for women.
